

TREE REMOVAL PERMIT APPLICATION

ABOUT TREE REMOVALS

A permit is required to remove a healthy, significant tree for existing single-family residential properties and existing commercial properties. This includes pruning that removes more than one-third of the existing branches. If development on the site is proposed or anticipated, removal shall not take place until a permit for construction has been issued.

The number of trees allowed to be removed depends on the property's zoning, the presence of critical areas, the lot size, and the number of trees previously removed. For more information, visit www.sammamish.us/trees.

The Arborist must provide you with an ISA Basic Tree Risk Assessment Form to upload along with this form and the other required submittal items (see page 4).

An Arborist Report may also be requested after City review of the submitted Assessment Form.

ABOUT IMMINENT THREAT TREE REMOVAL

Number removed:

This application should be submitted by property owners that have removed a significant tree due to an emergency event where the tree may have caused serious/life-threatening injury or death. Staff review the information submitted to determine if the removal qualified as an imminent threat.

If the condition that prompted the removal does not qualify as an imminent threat, staff will contact you to discuss next steps. Next steps will include a retroactive permit as a Significant Tree Removal and/or the tree removal actions being subject to Code Enforcement.
