

Geotechnical Engineering Support Services RFQ: Questions & Answers

October 1, 2024

QUESTION	ANSWER
Can the city clarify the type of materials testing services the City is looking for under the Scope of services, number 7. Materials Testing?	Material testing may include, but is not limited to, soil tests for compaction, permeability, and strength; rock tests for compressive strength and point load resistance; and groundwater analysis for chemical composition.
Is this a new or an existing contract?	It will be a new contract; however, the Parks, Recreation, and Facilities Department has previously contracted for these services.
If this is an existing contract, are there any incumbents? If so, who are they?	The Parks, Recreation, and Facilities Department currently has a contract for geotechnical engineering support services with Kleinfelder, which will terminate at the end of 2024.
